REMARKS			

SOURCE 25X1X

25X1A observed a number of 2-meter-high piles of runway mats on a strip 300 to 400 meters long in the southern section of Schoenhauser Damm airfield, which was referred to as Hohenheide. The sheet metal plates had an estimated length of 3 meters, a width of 50 cm and a plate thickness of 5 to 8 mm. The individual plates were attached together by hooks. Apparently the field will not be serviceable in the near future as the layer of turf on the landing field was still smooth and sown only recently with grass. Except for a light Soviet guard detail, no occupation was observed at the field. A heavy caterpillar tractor was seen at the installation.

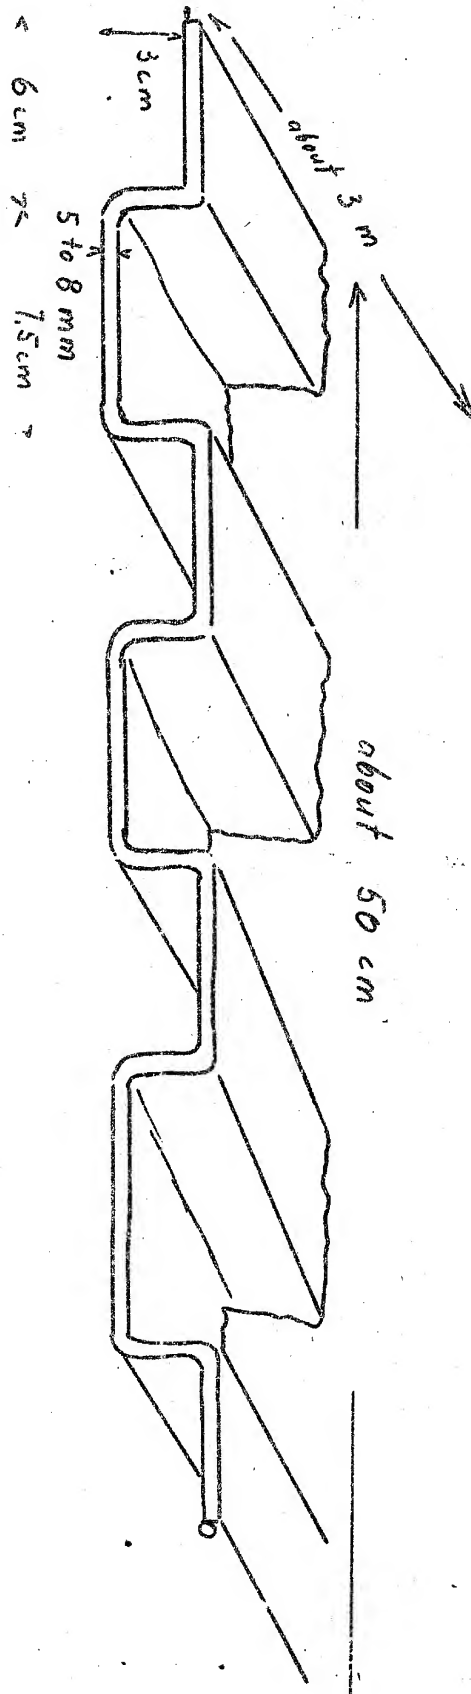

25X1A 25X1B
 Comment. Schoenhauser Damm airfield was newly established in 1952. The field is apparently to be provided with a runway covered with runway mats. For profile of runway mat, see Annex.
